WELCLOME!

I'm thrilled to have you here, where you can explore my portfolio and see how I blend design and development to create engaging and user-friendly websites.

About me

Hi, I'm Lujain Alattar, a web developer & Designer. I specialize in JavaScript, HTML, CSS, React, PHP, and Laravel. I enjoy building beautiful, functional websites for clients and keeping up with the latest tech.

Skills

UI/UX design

My skills in UI/UX design enable me to create visually appealing and user-friendly interfaces that deliver a seamless user experience.

Web design

As a web designer, I specialize in creating custom designs that reflect my clients' brand identity and meet their specific business needs.

Web development

As a web developer, I have extensive experience in developing and maintaining websites using various programming languages and technologies, from front-end design to back-end functionality.

Qualifications & Experience

I am a software engineer with a Bachelor's degree in Software Engineering from WISE University.Now as a trainee in a coding academy, I am currently undergoing a comprehensive program to gain technical skills and hands-on experience in web development. I am currently learning HTML, CSS, and JavaScript programming languages, and have completed several projects as part of my training, including a responsive website and a JavaScript game. I am also becoming familiar with software development tools such as Git and GitHub. I am excited to continue developing my skills and knowledge in web development and to apply them to real-world projects. I am a quick learner and I am passionate about coding, and I am eager to join a team where I can contribute and continue to grow as a web developer.

Projects

From responsive website designs to interactive web applications, my portfolio reflects my dedication to creating high-quality, visually stunning, and user-friendly projects

Website

Description: "I created a secure e-commerce website for a retail client that featured easy navigation, modern design, and an admin dashboard to manage inventory and track orders. The website successfully boosted the client's online sales."
